

joomla and rockettabs

Posted by edel - 13 Apr 2010 05:10

so my first problem is that when i click on a product category for example toys for her the page comes up but you have to scroll down all the way to the bottom of page and thats where the category is located the rocket tabs dont go away. what is the problem?

Hello Edel,

My first impression would be that the module is published on all (menus) pages.

Perhaps you can send me a PM with admin user details and I can have a look in the backend for you.
