

I want Twitter in my Joomla website

Posted by joomtorial - 12 May 2009 16:28

Twitter is becoming so popular. So how about Twitter in Joomla?

Well there are plenty of Twitter Tools and Extensions available for Joomla. The bad thing is, there are dozens of extensions that all do the same. One looks a bit better, the other is easier to configure, but in short, if you take 10 Joomla Twitter extensions. 9 do the same thing; show you your last Tweets or the last Tweets of your Followers.

To make life a bit easier, I have done some testing and written a little article about Twitter Tools. In that article I have listed what I found the easiest and most convenient Joomla Twitter Extensions. You can read the article here: <http://www.joomtorial.com/news/38-joomla-twitter-tools>
