Formatting my Blog page like your News page...
Posted by rob - 12 Jun 2009 21:14

_____

Hey Piet,

I love the way you have your News page formatted showing one full blog post followed by the "All Joomla Video Tutorials Team Blog Items" title with the links below it.

I've recreated my Blog page to intro with 2 and be followed by the links.

How do I add style to the "More Articles..." title to make it more visually pleasing?

Here's my blog page...

Hi Rob,

In your CSS style sheet you can make changes to make styling a bit more attractive. See (click) screenshot below.
