RokComments using Disqus displaying weird
Posted by rob - 27 Apr 2010 22:50

_____

I installed the RokComments plugin using the Disqus comments option on a Joomla site.

www.hispanicfamily.org/Joomla/blog/35-bl...rward-in-puerto-rico

If you look at this post in various browsers (Chrome, Firefox, IE), you get different results.

The footer box with the copyright info covers up the comment box.

How do I correct this so that they don't overlap?

Thanks!
