

How to back and restore your Joomla website?

Posted by joomtitorial - 02 May 2009 12:17

Hi all,

A golden rule in everything that has to do with computers and websites. Backup, backup, backup!

Joomla hasn't got a backup feature built in. But there are great and simple ways to make backups of Joomla. And a great plus, easy backup in this case also means easy restoration.

Since writing down how to backup your site would simply be too much text and would become very hard to read, we created a Joomla video tutorial on how to backup and restore your Joomla website. You can download it or can watch it online here: [Backup and Restore Joomla website](#)
