

Soesjeshuis - Custom Developed Template

Posted by joomtitorial - 22 Jan 2009 02:41

Website URL:: <http://www.soesjeshuis.nl>

Additional Extensions: (Components, Modules, Plug ins):

- VirtueMart
- ArtioJoomSEF
- Ideal Payment System

Custom Development:

The entire template was custom developed.

The VirtueMart part is highly customized for viewing purposes and also has a huge customization for the Dutch Ideal payment system

Other Features:

Design was done by a 3rd party designer called Lucky Dibz. We implemented the design in a Joomla e-commerce environment. Sales are fully automated and a calender/ choose delivery date/pick up date has been added by us.

Additional Information:

The website and product soesjes (sort of Dutch name for Sweet cakes) is entirely new to The Netherlands. Poepke knows cake, but are not known with the 2 and 4 bite cakes that resemble and are a combination of muffins, donuts and sweet cake, but in a bite-sized package.

if you want to get hungry, be sure to visit the sweet cake site: <http://www.soesjeshuis.nl>
